Welcome

Welcome to the new Maystar Skincare universe! We've been devoted to innovation, skincare and high-end salon beauty for almost 40 years. Our commitment to quality demands we invest a lot of time and resources in research. And that's what makes our Maystar Lab and R&D and innovation team one of the cornerstones of our skincare business.

They conduct research and push boundaries, testing and producing magistral formulas for every kind of skin problem.

We buy pure active principles. And we've created a few new ones, synthesizing plant-based peptides to imitate nature's all-encompassing healing power. This meticulous research and selection sometimes requires these active principles to be absolutely pure and highly concentrated, which allows us to achieve our aims but can occasionally mean the price would be beyond many customers' reach.

One of my commitments to the salon sector is to work hand-in-hand with beauticians so that they can offer their customers a new, honestly priced alternative to luxury cosmetics.

I'm now proud to present our new range of face and body care solutions. Flawless formulas, pure active principles, fast-acting and cumulative long-lasting solutions and magically inspirational and glamour-filled concepts grounded in rigorous scientific practice, all created by our team of cosmetologists, biologists, dermatologists and chemists working in close partnership with the prestigious Rovira i Virgili University and its internationally renowned Dermatology Department.

Some of our products have been part of our catalogue for years and, constantly updated, remain iconic must-have references. We're also working on extending several lines, among them Synergy, our worldwide bestseller. It's a line that solves the two main problems associated with ageing: wrinkles and skin flaccidity. It currently features two patented components and has won a Marie Claire Prix d'Excellence de la Beauté two years running, an award that places us in the same category as the beauty system's most highly renowned retail brands.

This catalogue also contains a host of new products, complete categories of masks that harness the lunar cycle's power, instant beauty-boosting ampoules, new textures, high-end packaging and a cross-cutting concept that serves as our mantra and guide: Vital Beauty.

And we continue to create new protocols and intensive training plans, as well as holding free workshops and learning experiences for the salons that place their faith in us, and which will always have our full support.

It's a philosophy summed up by the understanding that youth is ephemeral, but beauty is eternal. That beauty is no longer measured linearly by time and that the stigma associated with maturity and ageing, which equates beauty with youth, has been dispelled.

It's summed up by an understanding that we're right when we say that good cosmetics certainly beautify, but that ageing can only be held in check by exercise, good diet, meditation, constancy, cell hydration and a lifestyle that you can learn about, try and, hopefully, adopt in our Guide to Vital Beauty, now in its second edition and available either directly from us or via our distributors.

To finish, you'll have noticed that we're striving to raise awareness about beauticians and their work. Maystar doesn't pay influencers, because the real influencers are the beauticians who use our products and in whom we're investing by co-creating products with them and raising their profiles. As part of this we've created an Ambassador Programme that places them centre-stage as we work hand-in-hand to change the rules of the game. Join us in working together to revolutionize the salon beauty sector (ask your distributor for an ambassador pack).

Change takes courage.

It's who we are.

It's who our distributors are.

It's who our ambassadors are.

Because good things happen in life when you give a little more than you need to.

Thank you from the bottom of our hearts for sharing this journey and providing premium beauty solutions: top quality, honest cost.

Dennis Bonan
CEO Maystar Group

Our
Commandments
Vital Beauty by
Maystar Skincare

1. We celebrate experience and are always there when you're at your best, here and now.
2. We pamper your skin throughout life.
3. We seek what we women share, not what divides us.
4. We make cosmetics work for us. No more servitude.
5. We innovate to bring you more unique cosmetics formulas.
6. We are and will always be sustainable and cruelty-free.
7. Top quality, honest cost.
8. We look after and develop our beauticians.
9. We empower women by caring for their skin.
10. We offer premium salon beauty care products.

Beauty without artifice. Environmentally friendly active principles. Cruelty-free.

Not just another product, but a discerning way of life.

Research and development. Technology. Unique protocols.

38 years' experience. Leading specialists in cosmetology, dermatology, dermocosmetics and biology at Maystar Lab, internationally renowned for its scientific prowess.

We love what we do, who we do it with and who we do it for, and we're passionate about transforming our sector.

Thanks for helping us live a dream that comes true every time that someone like you reads it. And that grows when other dreamers like you, who make sustainable beauty their goal, join us.

Active principles

SATSUMA EXTRACT

This Japanese orange's outstanding skin-lightening properties inhibit melanin production, leaving skin whiter and purer.

KOJIC ACID

Possessing powerful whitening properties, kojic acid helps inhibit tyrosinase production, one of the stages of melanin synthesis. It also reduces hyperpigmentation, leaving skin lighter and blemish-free.

VITAMIN C

Vitamin C is a powerful antioxidant that naturally repairs skin and leaves it looking luminous. It protects against free radicals, making it ideal for combating signs of ageing and the harmful effects of air pollution and sun exposure.

Porcelain skin

The effects of time and sun produce dermis-ageing blemishes. However, there is a way to regain porcelain skin. This experience lightens, renews and illuminates your complexion to create a beautifully even skin tone. It's the ideal end-of-summer treatment!

Active principles

PROBIOTIC COMPLEX

Possesses numerous skin-enhancing properties. Notably boosts regeneration of upper layers, strengthening the skin's defence mechanisms against environmental agents and chronological ageing.

VITAMIN E

A powerful antioxidant, vitamin E is one of beauty care's greatest allies. Rejuvenates skin and protects it against the free radicals that cause skin ageing. Moisturizes and protects against solar radiation's harmful effects.

LACTIC ACID

Skin-regenerating AHA. Boosts luminosity and reduces fine wrinkles and early signs of ageing.

KOJIC ACID

Possessing powerful whitening properties, kojic acid helps inhibit tyrosinase production, one of the stages of melanin synthesis. It also reduces hyperpigmentation, leaving skin lighter and blemish-free.

NATURAL AHAS

AHAs' molecules dissolve dead cells in the skin's upper layers, encouraging cell renewal. They also possess moisturizing properties.

AZELOGLYCINE

Powerful skincare active principle possessing anti-bacterial, sebum-balancing, anti-acne and anti-keratinization properties. Enhances skin hydration and elasticity. Hypoallergenic and non-comedogenic.
